

# e-Portfolio Reflection 2

## OLTD 501 – Annotated Bibliography

### OLTD Learning Outcome:

Scaffold digital citizenship from K-12 to professional level of educators:

- Examine current research around best practices and emerging practices

### Evidence Chosen to Support Outcome:

I have chosen an annotated bibliography as the second piece of evidence on my e-portfolios. This document includes a quick overview of current 5 scholarly articles that analyze George Siemens ideas known as Connectivism.

### Reflection to Support Evidence:

This assignment provided me with the opportunity to learn about different ideas surrounding George Siemen's Connectivist ideas while reflecting about the pros and cons associated with this school of thought. Also, completing this assignment offered me a chance to begin shaping my own ideas about the topic and how this may impact my practice.

The process of collecting and organizing bibliography for this assignments was incredibly useful. I want to learn more about current research and emerging practices and it is always very challenging for me to stay organized. RefWorks is a tool that will make a world of difference for someone like me. It was great to learn that alumni from institutions that provide this service to their students like VIU will be able to continue using RefWorks as long as the institution continues to subscribe.

As an educator it is fundamental to periodically review current research in order revisit our personal course design models, learn best practices and new opportunities for development. I will definitely continue building up my virtual library.
