e-Portfolio Reflection 1

OLTD 511 – Special Topics. Blended Learning

OLTD Learning Outcome:

- Plan learning opportunities most suitable to the strengths and challenges of a variety of environments

Evidence Chosen to Support Outcome:

The evidence I chose is my first attempt to "blenderize" my existing teaching environment. The document follows the blueprint for developing and implementing blended learning programs as outlined in *Blended: Using Disruptive Innovation to Improve Schools* (Horn and Staker, 2014).

Reflection to Support Evidence:

This assignment was an opportunity to look at my existing teaching environment and evaluate its limitations and potential. It is easy to become comfortable with our daily practice or to tell ourselves that in order to make meaningful changes other structures beyond our control must also change.

Developing this project provided me with a framework that can be used on a variety of settings throughout my teaching career. The eight guiding questions that serve as an outline to this project, can be used as a template to systematically analyze many aspects of my teaching environment in order to transform, improve an innovate my practice.
