

# e-Portfolio Reflection 1

## OLTD 506 – Social Media

### OLTD Learning Outcome:

Scaffold digital citizenship from K-12 to professional level of educators

- Consider responsibility, accountability and civility in online environments

### Evidence Chosen to Support Outcome:

This assignment was the culminating task for the Boundaries section of the course. We were expected to reflect on some of the ethical, professional, legal and social justice aspects in regards to the use of Web 2.0 tools.

### Reflection to Support Evidence:

I chose this assignment because the content on the Boundaries section of the course was a game changer for me. Although I had some prior knowledge and “common sense” when it comes to the use of Web 2.0 tools, there were aspects that never crossed my mind, particularly when it comes to social justice.

Working in a somewhat isolated district, the matter of social justice was a fundamental reflection for me and pushed me to make some changes in my practice. First, by taking under consideration the issues of access and second, to understand the importance to ensuring that digital citizenship is embedded on what I teach.
