

# e-Portfolio Reflection 2

## | OLTD 505 – Open Educational Resources

### OLTD Learning Outcome:

- Become familiar with common terms, definitions and elements related to online environments

### Evidence Chosen to Support Outcome:

This was a very open assignment where we were asked to reflect about our learning during the course. I chose to create an Office Mix to share my most meaningful learning experiences throughout the course.

### Reflection to Support Evidence:

Creating this assignment was an opportunity to not only reflect about the world of available open educational resources and its potential use in my classroom, but also it was an opportunity to understand the impact of open education in the world and how it is transforming the way we learn and share our knowledge.

Also, creating this assignment helped me to develop stronger technical skills with Office Mix, which on itself is a wonderful and very flexible resource that has many applications in my practice. After learning how to use Office Mix, I have developed some lessons and helped some of my colleagues to learn how to use it.
